Symbols and other usages

The following standard symbols are used in publications of the Tasmanian Office of the Bureau:

ASIC	Australian Standard Industrial Classification
M	males
F	females
P	persons
n.a.	not available
n.e.c.	not elsewhere classified
n.e.i.	not elsewhere included
n.p.	not available for separate publication, but included in totals where applicable
n.y.a.	not yet available
p	preliminary — figure or series subject to revision
r	figure or series revised since previous issue
s	subject to sampling variability too high for most practical purposes
..	not applicable
—	nil or rounded to zero
—	break in continuity of series (where a line is drawn between two consecutive figures in the same column, or alongside two or more figures in consecutive columns)
(M)	Municipality
(C)	City

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

Values are shown in Australian currency.

Commentary

Definitions

Trend series estimates are used to "smooth" data to enable longer term trends to become more noticeable. They are the preferred series to use when making a comparison over time, eg. 12 months.

Original series estimates (or unadjusted estimates) are the survey data as collected, generalised to the relevant population. These estimates have not been seasonally adjusted or trend adjusted ("smoothed").

Employment

States' trend series comparisons —

The Australian and State *trend series* comparisons, shown on page 24, indicate that there was an increase of 0.8 per cent in Tasmania's employment over the year to November 1994. The largest percentage increase in employment was in Queensland (5.4 per cent). The next highest increase in employment was in Western Australia (4.0 per cent), followed by NSW (3.3 per cent) and Victoria (2.7 per cent). South Australia had an increase in employment of 2.1 per cent.

Regional Tasmania's original series figures —

In the Hobart and Southern Statistical Division the estimate of *unadjusted* employment increased by 4000 between September 1993 and September 1994 to 98 200. The estimate of employment in the Mersey-Lyell Statistical Division was 43 900 in September 1994, an increase of 1500 on the figure for September 1993. Employment in the Northern Statistical Division decreased by 1500 between September 1993 and September 1994 to 53 800.

(See tables 3–8, pages 2–7.)

Unemployment

Tasmania's trend series figures —

The Tasmanian provisional *trend series* estimate of 24 000 unemployed persons in November 1994 was a decrease of 3400 on the figure for November 1993 of 27 400. The estimate of the unemployment rate of 11.0 per cent in November 1994 was a decrease compared to the estimate of the unemployment rate of 12.5 per cent in November 1993.

(See tables 3–8, pages 2–7.)

The labour force

Tasmania's trend series figures —

In November 1994 there was an *unadjusted* estimate of 366 500 civilian Tasmanians aged 15 or more. There were an estimated 218 300 persons (based on *trend series* estimates) in the labour force. The estimate of the labour force participation rate in November 1994 was 59.6 per cent, compared with the figure of 60.3 per cent in October 1993.

For males, the estimate of the participation rate was 71.4 per cent, compared with 71.5 per cent for November 1993. For females, the estimate of the participation rate was 48.1 per cent (compared with 49.5 per cent in November 1993).

(See table 3, page 2.)

Employed wage and salary earners

In March 1994 there were approximately 142 500 employed wage and salary earners in Tasmania. In March 1992 the figure was 144 700 employed wage and salary earners.

In February 1994 the Tasmanian public sector accounted for 31.7 per cent of all employed wage and salary earners. Overall, the category Community services had the

highest industry representation — 30.0 per cent — compared with the equivalent figure of 24.3 per cent recorded in February 1992. The next highest industry grouping was Wholesale trade and Retail trade (19.7 per cent, compared with 19.0 per cent in February 1992) and Manufacturing (13.0 per cent, compared with 16.8 per cent in February 1992).

In February 1994, women made up 45.6 per cent of employed wage and salary earners. In February 1992, the equivalent figure was 44.0 per cent.

(See table 9, page 8.)

Award rates of pay indexes

The annual movement from October 1993 to October 1994 of weekly award rates of pay indexes for Tasmania rose by 1.0 per cent for full-time adult females and by 0.9 per cent for full-time adult males. For Australia, the figures were 1.4 per cent for females and 1.2 per cent for males, for a combined annual increase of 1.0 per cent.

For full-time adult female employees in Tasmania, the largest industry increases over this 12 month period occurred in Recreation, personal and other services (3.0 per cent); and Manufacturing (2.4 per cent).

For the same period for full-time adult male employees in Tasmania, the largest industry increases occurred in Recreation, personal and other services (2.2 per cent); and Wholesale and retail trade (1.9 per cent).

The largest occupation increases over the same period for full-time adult female employees occurred in Plant and machine operators, and drivers (2.5 per cent); and Tradespersons (1.9 per cent).

For full-time adult male employees the largest occupation increases over the period occurred in Salespersons and personal service workers (1.9 per cent); and Labourers and related workers (1.2 per cent).

(See table 14, page 10.)

House price indexes

For the 12 months ended September 1994, Hobart recorded a 7.1 per cent increase in the cost of established houses. The extremes in price movement recorded were a 17.8 per cent increase in Darwin and a 0.8 per cent decrease in Canberra. For the same period, Hobart recorded a 2.8 per cent increase in the cost of project homes. Darwin recorded the highest increase over the period, 8.7 per cent, while Canberra recorded a decrease in costs of 1.9 per cent.

The movement recorded in Hobart for the September quarter 1994 was 1.7 per cent for established houses and 0.6 per cent for project homes.

House Price Indexes: Eight Capital Cities, September Quarter 1994, ABS Catalogue No. 6416.0, released on 9 December 1994, \$27.50

Gross State product

Tasmania's Gross State Product (GSP), increased by 0.2 per cent in the September quarter based on trend constant price estimates. The increase in GSP for the previous quarter was 0.6 per cent. The growth rate recorded for the September quarter was the lowest of all the States, and was considerably below the figure for Australia [that is, change in GDP(I)] of 1.4 per cent.

Over the 12 month period to September 1994, the GSP of Tasmania decreased by 0.2 per cent in trend constant price terms. This was clearly against the national trend, which increased by 5.7 per cent.

The low figure for GSP growth in the September quarter can be explained by the decreased growth in two of the components of GSP, these being wages, salaries and supplements, and gross operating surplus. The third component, indirect taxes less subsidies, grew strongly at 6.9 per cent, higher than the national figure of 5.0 per cent.

Australian National Accounts — State Accounts, ABS catalogue no. 5242.0, released on 15 December 1994, \$26.00

Livestock slaughtering

Trend series estimates —

The Tasmanian *trend series* estimates for slaughtering of cattle and calves, and sheep and lambs are higher in October 1994 than in September 1994, while for pigs the trend series estimate dropped.

Livestock slaughtering for cattle and calves showed an upward trend due to large numbers slaughtered in October. This trend is continuing. For October 1994 the trend series shows 18 700 cattle and calves were slaughtered. This was up 1.3 per cent on the October 1993 level of 18 400.

A high level of sheep and lambs slaughtered during recent months has pushed the trend series to high levels in recent months although the growth is slowing. The trend series estimate of 113 100 for October 1994 is 36.6 per cent above the trend series estimate of 82 800 sheep and lambs slaughtered in October 1993.

The trend for pigs slaughtered shows a peak in December 1993 and January 1994 of 8000, followed by a slight dip to July 1994. The trend has declined more steeply over the last three months. The trend series estimate of 7558 pigs slaughtered in October 1994 was 3.2 per cent down on the estimate at October 1993.

(See table 21, page 16.)

Building approvals

There were 325 new dwelling units approved during October 1994 in Tasmania, a four per cent increase on the number recorded for September 1994, but a seven per cent decrease on the figure recorded for October 1993 (351).

For the twelve months ended October 1994 there were 3970 new dwelling units approved, four per cent below the 4116 units recorded for the previous corresponding twelve months.

The latest monthly trend estimates for the number of dwelling units approved show twelve consecutive months of decline.

The highest number of dwelling units approved in October 1994 was recorded by the City of Launceston with 34, followed by the City of Clarence with 27, the Municipality of West Tamar with 24 and the City of Glenorchy with 23.

The value of new residential building approved, at current prices, in October 1994 was \$25.7 million, compared with the September 1994 figure of \$24.5 million and the October 1993 figure of \$23.6 million.

The value of new residential building approved, at average 1989-90 prices, in September quarter 1994 was \$58.1 million compared with \$58.5 million in June quarter 1994 and \$65.1 million in September quarter 1993.

(See table 27, page 19.)

Retail

Note: The retail trade survey has been redesigned. For more information see Information Paper (ABS Catalogue No. 8511.0).

The trend estimate for turnover of retail and service establishments for October 1994, in Tasmania, was \$231.5 million, an increase of slightly more than one per cent on the October 1993 figure of \$228.8 million. The monthly trend estimates have shown little or no growth over the first ten months of 1994.

The trend estimate of turnover for October 1994, for Australia (\$9347.2 million), was over eight per cent higher than for October 1993. Growth in the trend estimate of turnover was 0.9 per cent for October 1994 which is similar with the growth for each month from July.

Victoria, Queensland and South Australia have shown strong growth in retail turnover in recent months. New South Wales, Western Australia and the Australian Capital territory have shown moderate to strong growth during the three months ended October 1994.

In original terms, the estimate of retail turnover in October 1994, for Tasmania, was \$224.2 million, an increase of less than one per cent on the figure recorded for September 1994 and more than two per cent less than the figure recorded for October 1993.

(See table 35, page 23.)

New motor vehicle registrations

There were 1274 new motor vehicles (excluding motorcycles) registered in Tasmania during October 1994. This was over two per cent more than for September (1247) and 19 per cent higher than the figure recorded for October 1993. There were 178 vehicles registered by vehicle rental businesses during October 1994.

Registrations for the twelve months ended October 1994 (13 298) were nearly seven per cent more than for the twelve months ended October 1993 (12 469).

(See table 34, page 23.)

October	231	153	3 420	3 920

(a) Due to changes to the *Banking Act 1959* in December 1989, which removed the distinction between trading and savings banks, figures previously published in this table are no longer comparable with those shown above. (b) Details are the averages of weekly figures for each month. The figures are derived from returns submitted by banks authorised under the *Banking Act* together with similar returns voluntarily submitted by the State banks; they exclude the Reserve Bank. (c) Excludes non-resident loans.

September	p 69 138	340	13 430	p 82 908	p 66 659	—	—

(a) The following persons are not included in these statistics: passengers under three years of age accompanied by an adult; passengers travelling on chartered flights with minor carriers; passengers travelling on private or VIP flights; and passengers from or departing for overseas other than direct flights to New Zealand. (b) The proportion of departing passengers who were visitors was shown to be about 58 per cent in the 1981 Tasmanian Visitor Survey, 55 per cent in the 1984 Tasmanian Visitor Survey, about 53 per cent in the 1986 Tasmanian Visitor Survey, almost 65 per cent in the 1990 Tasmanian Visitor Survey, and just over 58 per cent in the 1993 Tasmanian Visitor Survey.

Table 32. Total passenger arrivals by air and sea into Tasmania

Period	Original	Seasonally adjusted (a)	Trend
1993 —			
September	72 372	66 639	67 385
1994 —			
July	60 164	75 220	75 132
August	p 57 998	p 77 344	p 76 023
September	p 82 908	p 77 466	p 76 877

(a) There is an annual recalculation of seasonal adjustment factors to include the most recent year's arrivals. This occurs at the end of each financial year and may cause revisions to previously published seasonally adjusted and trend figures. A full time series of seasonally adjusted and trend series from January 1971 is available on request telephone (002) 20 5870.

Cattle and calves	- 2.0	8.8	5.0	9.6	5.9	- 4.6	1.3
Sheep and lambs	9.6	3.8	- 25.4	8.9	17.8	8.5	1.5
Tourism							
Room occupancy rates for hotels, motels etc. with facilities, June quarter 1994 (%)	53.5	48.1	60.2	47.4	54.7	51.2	54.1
Australian National and State Accounts							
Percentage change in GSP (GDP), Constant Price (b) Trend Series							
June qtr 1994 to Sept qtr 1994	1.1	1.5	1.9	0.9	2.1	0.2	1.4
Sept qtr 1993 to Sept qtr 1994	4.7	4.9	7.1	2.0	10.2	- 0.2	5.7

(a) Australian totals include the ACT and NT.

(b) This is the first quarter for which constant price estimates have been published.

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L - premium rate 25c/21.4 secs.)

This number gives 24-hour access, 365 days a year for a range of statistics.

Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office (see below).

Bookshops and Subscriptions

There are over 400 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
